CURRENT CHALLENGES

Manual Inventory Tracking

Stock level tracked on paper

No centralized Stock System

Inconsistencies between physical and sales data

Limited Sales Channels

sales restricted to physical Walk-ins and TikTok

No Online Ordering

customer cannot browse or order products

WHO SUFFERS FROM THIS PROBLEM?

Persona 1: Shop Owner

Name: Mr. Vipilakumar Selvarajah (47)
Role: TeknelWorld Owner

Background:

- Runs shop selling laptops & mobile accessories and Manages everything manually (stock, sales, orders)

Goals:

- Increase sales
- Manage inventory easily
- Reach more customers online

Pain Points:

- Stock tracking errors
- Hard to manage customer orders
- No proper online selling platform

Needs:

- Simple website
- Inventory management system
- Easy order tracking

Persona 2: Customer

Name: Mr. George Vimalarajan (48)
Role: Tech Buyer

Background:

- Frequently buys phone accessories & gadgets
- Uses mobile for shopping
- Finds shops through social media

Goals:

- Quickly find products online
- Compare prices
- Easy ordering process

Pain Points:

- No website to browse products
- Must message manually to ask availability
- No clear pricing or product details

Needs:

- Online product catalog
- Easy ordering system
- Fast response from shop

EXISTING SOLUTIONS AND GAPS

Social Media Selling

- No proper inventory tracking
- Orders handled manually through messages
- No structured system for sales
- High Chance of missed orders
- No organized orders & stock management

Online Marketing Places

- High commission fees per sales
- Limited control over branding
- Hard to customize for shop needs
- Competition with many sellers
- Not suitable for small local business control

Manual System

- Paper-based or memory-based stock tracking
- Time consuming process
- Prone to human errors
- No real-time updates
- Inefficient and error-prone system

OUR SOLUTIONS

INVENTRORY

- Auto stock updates
- Low-stock notifications
- Product category management
- Stock history tracking

E-COMMERCE

- Product search & filters
- Customer reviews/ratings
- Wishlist feature
- Mobile-optimized UI

PAYEMENT

- Cash on delivery option
- Order confirmation system
- Payment status tracking
- Secure checkout

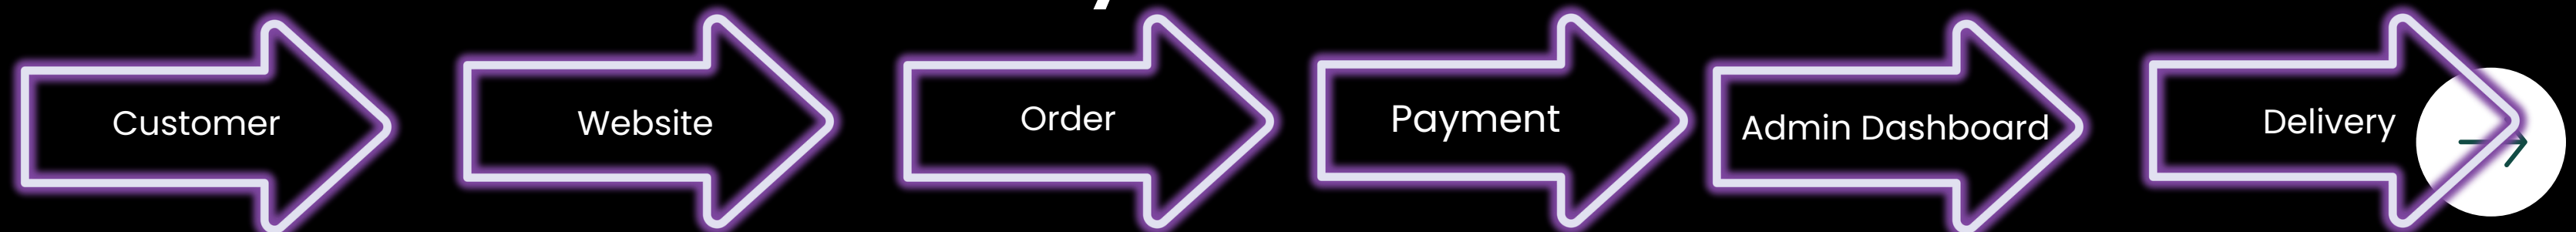

ORDER MANAGEMENT

- Order status tracking
- Order history
- Customer notifications
- Cancel/return handling

ADMIN DASHBOARD

- Sales analytics (daily/monthly)
- Best-selling products
- Customer insights
- Report generation

System flow

Unique Value Proposition

Key features that make us different

Compatibility Assistant

Smart inventory alerts

Online ordering system

Customer account system

Sales analytics dashboard

Chat / WhatsApp integration

Mobile-friendly design

Payment Gateway

Admin panel for full control

IDENTIFYING RISKS

User adaption issues

- *Simple and intuitive UI*
- *Provide basic training/demo*
- *Add user-friendly navigation*

Payment integration issues

- *Use reliable payment gateway*
- *Start with Cash on Delivery option*
- *Proper testing before deployment*

Time Constraint

- *divide tasks among team members*
- *Follow weekly milestones*
- *Prioritize core features first*
